	Key stage 1	Lower key stage 2
Make observations over time	observe closely, using simple equipment	<ul> <li>make systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers</li> </ul>
Ask questions and Identify patterns	<ul> <li>ask simple questions and recognise that they can be answered in different ways</li> <li>use observations and ideas to suggest answers to questions</li> </ul>	<ul> <li>ask relevant questions and use different types of scientific enquiries to answer them</li> <li>report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</li> <li>use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions</li> </ul>
identify, classify and group	identify and classify objects using a range of criteria	identify differences, similarities or changes related to simple scientific ideas and processes
Carry out controlled investigations	perform simple tests	set up simple practical enquiries, comparative and fair tests
Research using secondary sources	Use books, photographs and videos to answer questions of find out information	<ul> <li>use straightforward scientific evidence to answer questions or to support their finds.</li> </ul>
Apply mathematical knowledge including collecting, presenting and analysing data	gather and record data to help in answering questions	<ul> <li>gather, record, classify and present data in a variety of ways to help in answer questions</li> <li>record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables</li> </ul>

Key Stage 1: Year A

Autumn	Spring	Summer
<ul> <li>Every Day Materials and their uses</li> <li>What materials are everyday objects at school and at home made of?</li> <li>What words can I use to describe how materials look or feel?</li> <li>How can I group objects according to their materials?</li> <li>What is the difference between man-made (manufactured) and natural materials?</li> <li>Which materials come from plants?</li> <li>Which plants provide useful materials?</li> <li>How can I classify objects according to their origin?</li> </ul>	<ul> <li>Everyday Materials and their Uses</li> <li>What is meant by the following terms: malleable, waterproof, absorbent, transparent, magnetic?</li> <li>How can I group objects according to their material properties?</li> <li>Which properties make some materials better suited for specific objects than others?</li> <li>How could I test if a material was suited to a particular purpose?</li> <li>Why are we grateful to John Mackintosh?</li> </ul>	Plants  What plants are growing in our school grounds?  What are the main parts of a flowering plant?  What is the role of each part of the flowering plant?  How can I group plants according to what I can see?  What do seeds need in order to germinate?  What do plants need to grow and stay healthy?  How can I use scientific diagrams to record changes in a growing seedling?  Why is it important for a plant to spread its seeds and not just drop them in one place?  How are some seeds well suited for wind dispersal?

Key Stage 1: Year B

Autumn	Spring	Summer
Autumn  Animals including Humans  How have I changed since I was a baby?  What are the different parts of my body called?  What are my senses?  Which parts of my body is associated with each sense?  How do my senses help me as a scientist?  What do we call the young of some common animals?  Do all young animals look like their adult animals?  What do humans and other animals need for survival?  What is the difference between what I want and what I need?  Why does it matter what I eat?	Spring  Seasonal Changes  What do we mean by seasons?  What is the difference between weather and climate?  How can I record weather changes over time?  What patterns can I observe in the current weather?  What tools do scientists use to measure weather changes?  What words and symbols do weather forecasters use to share information about weather patterns?  Why does the length of day change through the year?  How can I use shadows to record the movement of the sun across the day?	<ul> <li>Summer</li> <li>Living Things and their Habitats</li> <li>What is the differences between things that are living, things that are dead, and things that have never been alive?</li> <li>How do scientists classify animals into groups?</li> <li>What are the key characteristics of fish, amphibians, reptiles, birds and mammals?</li> <li>What is a habitat and a micro-habitat?</li> <li>What can I observe in a micro-habitat in our school grounds?</li> <li>How are living things suited to this habitat?</li> <li>Which animals are carnivores, herbivores or</li> </ul>
<ul><li>Why is exercise important for humans?</li><li>What do we mean by good hygiene?</li></ul>	<ul> <li>Plants</li> <li>How do the plants in the school grounds change through the year?</li> <li>Which trees are deciduous and which are evergreen?</li> </ul>	omnivores?  • What is a food chain?

## Science - Substantive Knowledge Lower Key Stage 2: Year A

Autumn	Spring	Summer
Autumn  Rocks  Are all rocks the same?  How do they differ?  What rocks can I observe in my local environment?  How do geologists group rocks?  What is soil?  How are fossils formed?  What was Mary Anning's contribution to science?	Sound  • What are sounds?  • How are sounds made?  • How do we hear sound?  • How can we change the pitch of a sound?  • How can we change the volume of a sound?  • How do a string or percussion musical instruments produce sounds of different pitch?	<ul> <li>Living things and their Habitats</li> <li>What criteria might a scientist use to group different plants and animals?</li> <li>What are the seven characteristics of living things?</li> <li>What is the difference between vertebrate and invertebrate animals?</li> <li>What sub categories can be used to group vertebrate and invertebrate animals?</li> </ul>
<ul> <li>States of Matter</li> <li>What are the differences between solids, liquids and gases?</li> <li>How can a liquid be changed into a solid or a gas?</li> <li>Can we reverse these changes?</li> <li>At what temperatures can water be changed into a solid and a gas?</li> <li>Do all materials change state at the same temperature?</li> <li>What is meant by the terms condensation and evaporation?</li> <li>What effect does temperature have on evaporation and condensation?</li> <li>What is the water cycle?</li> </ul>	<ul> <li>Light</li> <li>What are natural and artificial sources of light?</li> <li>How do we see?</li> <li>What is meant by reflection? And what sort of materials can act as reflectors?</li> <li>How does the appearance of a reflection differ from the real object?</li> <li>How are shadows formed?</li> <li>How can I change the appearance of a shadow?</li> <li>What happens when light is shone through a prism?</li> <li>What did Ibn Al-Haytham contribute to science?</li> <li>Why can light from the sun be dangerous? How can I protect my eyes?</li> </ul>	<ul> <li>What are the unique characterises of some of these groups?</li> <li>What is an ecosystem?</li> <li>What is a habitat?</li> <li>What plants and animals live in a given* habitat?</li> <li>In what ways are they well suited to this habitat?</li> <li>How do they interact with one another?</li> <li>In what ways can humans' actions or decisions negatively impact this natural environment?</li> <li>What changes could we suggest to address this problem?</li> <li>* river, pond, rock pool, hedgerow</li> </ul>

Lower Key Stage 2: Year B

Autumn	Spring	Summer
Forces and Magnets  How do scientists define force?  What is the effect of different surface on a moving object?  In what way does magnetic force differ from other forces?  How can I sort magnetic and non-magnetic objects?  Which materials are magnetic?  How do magnets behave towards each other?  How are magnets useful in everyday life?	Animals including humans  Why do I need a skeleton?  How do my muscles work?  Why do I need to eat?  What are the nutritional properties of each food group?  How should this understanding influence what I eat?  What is my digestive system and how does it work?  Why are my teeth different shapes?  How can my teeth become damaged and what should I do to look after them?	<ul> <li>Plants</li> <li>What are the functions of each part of a flowering plant?</li> <li>What do plants need to live and grow?</li> <li>Do all plants need the same things?</li> <li>What can I learn about plants by changing certain growing conditions?</li> <li>How is water transported within a plant?</li> <li>What is the role of flowers in the life cycle of a plant?</li> <li>What role do insects play in pollination and fertilization of flowers?</li> </ul>
<ul> <li>Electricity</li> <li>Where does electricity come from?</li> <li>Why can electricity be dangerous?</li> <li>Where do we use electricity at home and at school?</li> <li>What is a circuit?</li> <li>What components could I include in a circuit?</li> <li>What must be in place for a lamp to light up in a simple series circuit?</li> <li>What is the role of a switch in a circuit?</li> <li>How can I find out if a material conducts electricity?</li> </ul>	<ul> <li>How are animals' teeth adapted to their diet?</li> <li>How do producers, predators and prey fit together in a food chain?</li> <li>What is the role played by decomposers?</li> </ul>	How are different seeds adapted for specific means of dispersal?
